	<b>Examiner</b> Alexander Jamal	<b>Art Unit</b> 2614	

**--The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

THE REPLY FILED 23 August 2006 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE.

1. ☒ The reply was filed after a final rejection, but prior to or on the same day as filing a Notice of Appeal. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The reply must be filed within one of the following time periods:

- a) ☒ The period for reply expires 3 months from the mailing date of the final rejection.
- b) ☐ The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.

Examiner Note: If box 1 is checked, check either box (a) or (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).

Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### NOTICE OF APPEAL

2. ☐ The Notice of Appeal was filed on \_\_\_\_\_. A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37 CFR 41.37(a).

#### AMENDMENTS

3. ☐ The proposed amendment(s) filed after a final rejection, but prior to the date of filing a brief, will not be entered because
- (a) ☐ They raise new issues that would require further consideration and/or search (see NOTE below);
- (b) ☐ They raise the issue of new matter (see NOTE below);
- (c) ☐ They are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or
- (d) ☐ They present additional claims without canceling a corresponding number of finally rejected claims.

NOTE: \_\_\_\_\_. (See 37 CFR 1.116 and 41.33(a)).

4. ☐ The amendments are not in compliance with 37 CFR 1.121. See attached Notice of Non-Compliant Amendment (PTOL-324).
5. ☐ Applicant's reply has overcome the following rejection(s): \_\_\_\_\_.
6. ☐ Newly proposed or amended claim(s) \_\_\_\_\_ would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).
7. ☐ For purposes of appeal, the proposed amendment(s): a) ☐ will not be entered, or b) ☐ will be entered and an explanation of how the new or amended claims would be rejected is provided below or appended.

The status of the claim(s) is (or will be) as follows:

***Response to Arguments***

1. Applicant's arguments have been fully considered but they are not persuasive.

As per applicant's argument regarding the Obuchi reference not teaching adding signal portions examiner notes Col 34 lines 60-67 (as cited in the final rejection) that discloses a composite device which will add or average signal portions with the error rates used as weighting functions for each signal portion, and additionally a selector which will choose the signal portion with the lowest error rate. These are two separate functions. The selector is in addition to the composite device. Examiner notes Fig. 7b and Figs. 8a,8b which show the functionality (adding or averaging) of the composite device. Examiner additionally notes the previously cited Higashi reference which could also be used to teach the well known concept of selecting or adding or averaging signal portions for site diversity.

As per applicant's arguments that the Kondo and Obuchi references do not deal with signal portions from different base stations examiner notes Obuchi's ABSTRACT.

As per applicant's arguments that Kondo and Obuchi do not disclose processing the signals on a frame by frame basis, examiner notes Col 3 lines 1-20 of Kondo (as previously cited). The selection is made after the error detection.

As per applicant's comments on the examiner's previous lack of response to arguments submitted with the prior amendment, examiner notes the above responses to all of applicant's outstanding arguments. Examiner additionally notes that the noted Higashi reference was presented to applicant because the examiner uncovered it while

reconsidering applicant's amended claims. Examiner maintains that while the Higashi reference could easily be used as a teaching reference in combination with Kondo to read on applicant's claims, it is not required because applicant has not overcome the Obuchi reference.
